PVC PROFILES

MADE UP GROUND PROFILE

This is a component that prevents the deformation that can be formed due to the expansion and contraction in the field concrete. It also removes the concrete cutting or filling necessity. It is made of rigid PVC.

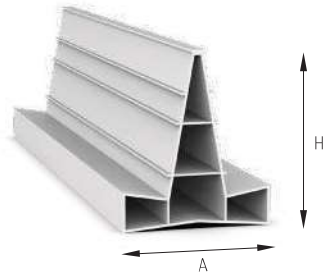
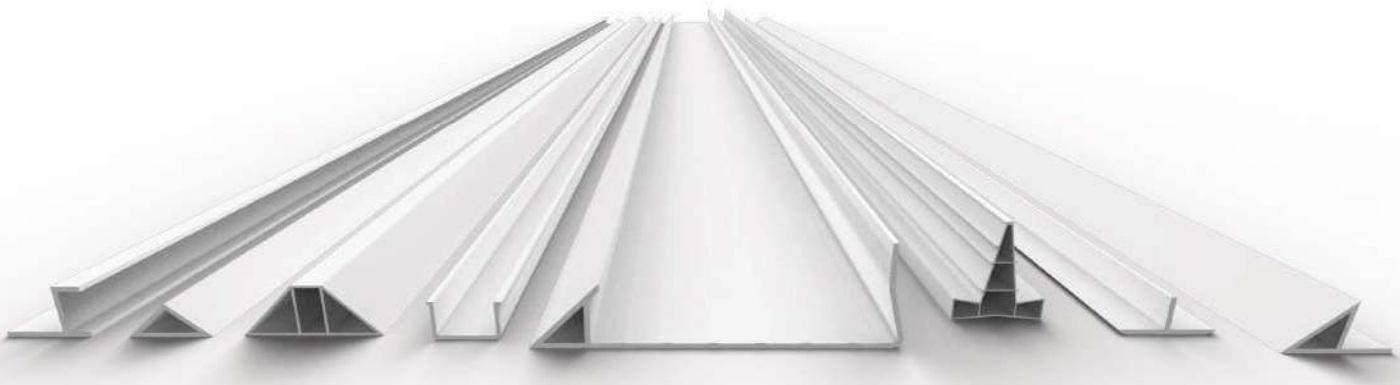
CRACK INDUCER

In industrial concrete floors, these are used for generating joints more conveniently and removes the cutting and filling necessity of them. Its usage is practical and economic due to its function as both mold and dilatation component. It is made of rigid PVC and has a standart length of 3 Meters



CODE	REFERENCE	A(mm)	H (mm)	PACKAGE	
				QTY	UNIT
2700350040	40 mm	34	40	30	Meter
2700600070	70 mm	60	70	30	Meter

It basically:

- Solves improperly cut joints and edge fracturing problems
- Removes the necessity for grouting material
- Prevents the formation of shrinkage cracks
- Removes the grade problems.


ALL OUR PVC PROFILES CAN BE PRODUCED ANY LENGHT AND ANY COLOR DEMANDED.
